

AKSHAT GUPTA

M.No.: (+91) 7290888525 | [Email: gemini.akshatgupta@gmail.com](mailto:gemini.akshatgupta@gmail.com) | [LinkedIn](#) | [GitHub](#)

Personal Summary

Results-driven and detail-oriented Computer Science student with expertise in web development using MERN stack. Skilled in designing and developing modular, responsive, and user-friendly UI/UX solutions. Completed internship at Nexgen Tech Solutions, where I engineered scalable, efficient, and adaptive front-end designs. Passionate about building high-performance applications and continuously expanding technical knowledge to solve complex problems. Demonstrated leadership, and communication skills through event coordination, technical presentations, and cross-functional team collaboration to deliver impactful results.

EDUCATION

- **B.Tech [Computer Science] | Vellore Institute of Technology**
CGPA: 9.35 (up to 4th semester) | August, 2023 – July, 2027
 - **Pre-University | Birla Vidya Niketan School, Delhi**
CBSE: 95.2% | April, 2022 – May, 2023
 - **Secondary School | Birla Vidya Niketan School, Delhi**
CBSE: 99.6% | April, 2020 – May, 2021
-

SKILLS

- **Programming Languages:** C, C++, Java, Python, TypeScript, JavaScript, HTML, CSS
 - **Frameworks & Libraries:** React.js, Next.js, React Native, Express.js, Node.js, NumPy, Pandas, Matplotlib, PyTorch (basic), GSAP, Framer Motion, EJS, Tailwind CSS, Bootstrap, LangChain
 - **Databases:** MySQL, MongoDB
 - **Developer Tools & Platforms:** Git, GitHub, GitHub Pages, Visual Studio Code, Tableau, Power BI, Microsoft Access, Excel
 - **Core Computer Science Skills:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving, Debugging, API Integration
 - **Soft Skills:** Leadership, Team Collaboration, Public Speaking, Event Management, Marketing Strategy
-

WORK EXPERIENCE

Nexgen Tech Solutions | Frontend Intern [Certificate](#)

May, 2025 – June, 2025

- **Bookmarked Books App** – Built with **ReactJS** and **Google Books API**, featuring **book search, bookmarking, and 100% persistent local storage** for enhanced usability and retention.
 - **Redux Counter App** – Developed with **Redux Toolkit**, reducing **state management boilerplate by 40%** and ensuring a **scalable architecture**.
 - **ShopSagaRedux** – Created an **e-commerce cart app** using **Redux-Saga** for **asynchronous operations**, improving **cart responsiveness by ~50%**.
 - **Reusable UI Components** – Engineered a **responsive Navbar & Sidebar with React Router**, achieving **100% mobile responsiveness** and **30% code reduction**.
-

HACKATHONS

- **Yantra Central Hackathon – Yantra 2025, VIT Vellore (Feb 3–9, 2025)** [Certificate](#)
Participated in the central hackathon event as part of VIT Vellore's premier technical fest, Yantra 2025. Our team built a **gesture recognition system** that did **not rely on cameras**, instead utilizing sensor-based hardware to detect hand movements.

- **Role:** Created and built the hardware component for capturing hand gestures using flex and motion sensors, and implemented the software layer using the **Arduino IDE** to interpret sensor input.
 - Developed the communication pipeline to **transmit gesture data via Bluetooth** to a mobile application for real-time response and control.
 - Contributed to both hardware integration and embedded code optimisation for smooth data recognition and transfer.
 - **Achieved Top 10 position (out of 100+ teams)** for innovation and feasibility of the project idea.
- **Cook-Off 9.0 – DSA Hackathon – VIT Vellore (Sept 27-19, 2024) [Certificate](#)**
Participated in **Cook-Off 9.0**, a competitive programming hackathon focused on **data structures and algorithms**.
 - Solved a series of time-bound DSA challenges involving graph algorithms, recursion, dynamic programming, and greedy techniques.
 - Collaborated in a team of 3 to tackle complex problem sets under tight time constraints, focusing on optimal code performance and accuracy.
-

WORKSHOPS

Summer School on AI: Deep Dive into Deep Learning [Certificate](#)

Completed a 6-week Summer School on AI & Deep Learning (Delhi Technological University (DTU), 2024), gaining hands-on experience with PyTorch, CNNs, RNNs/LSTMs, Transformers, and Generative AI (GPT-2, Autoencoders, Diffusion Models). Worked on projects in image classification, NLP, fake news detection, image captioning, and vision-language models (CLIP), applying techniques like backpropagation, regularization, and K-fold validation to improve model accuracy and efficiency.

PROJECTS

BooksToDo-WebApp [GitHub](#)

Overview: A scalable, interactive full-stack application that integrates with the Google Books API to enable users to search, manage, and track personal reading lists through a responsive, user-friendly UI.

Features & Implementation: API-Driven Book Search · CRUD Operations · Optimized REST API Integration · Client-Side Routing · Responsive UI/UX · Reusable React Components · Environment Configuration · Modular Architecture · Planned: JWT Authentication, Role-Based Access Control (RBAC), Middleware Security, Database Persistence.

Tech Stack: React · Node.js · Express.js · MongoDB (Mongoose – planned) · axios · react-router-dom · dotenv · CSS · MVC Pattern · JWT (future) · Scalable Frontend Architecture

Smoothy-Receipies-WebApp [GitHub](#)

Overview: Full-stack recipe management web app with user authentication, JWT-based sessions, role-based access, and CRUD operations, built on Node.js, Express, MongoDB, and EJS.

Features & Implementation: Authentication · Authorization · JWT · Session & Cookie Management · MVC Architecture · RESTful APIs · CRUD Operations · Form Validation · Middleware · Database Modeling · Role-Based Access Control · Error Handling.

Tech Stack: Node.js · Express.js · MongoDB (Mongoose ODM) · EJS Templating · JWT · cookie-parser · validator · dotenv · REST API · CSS · MVC Pattern · Middleware

ShopSageRedux-WebApp [GitHub](#)

Overview: A modern, frontend-only e-commerce demo built with React and Redux Toolkit, showcasing scalable global cart state management and dynamic user interactions.

Features & Implementation: Add-to-Cart · Remove-from-Cart · Quantity Updates · Live Cart Totals · Redux Toolkit State Management · React Router Navigation · Modular Components · Mock Data Integration · Planned: API Integration · Database Persistence · JWT Auth

Tech Stack: React · Redux Toolkit · React-Redux · React Router DOM · CSS · Create React App · Modular Component Architecture

NavBarSideBar-WebApp [GitHub](#)

Overview: A responsive React UI application showcasing dynamic navigation with a collapsible sidebar and top navbar. Developed with modern layout techniques, modular components, and client-side routing to demonstrate scalable front-end engineering practices.

Features & Implementation: Responsive Layout · Collapsible Sidebar · Icon-Based Navbar (lucide-react) · Client-Side Routing · Modular Components · Unit Testing Setup · Planned: Theme Toggle · Advanced Animations · Role-Based Navigation

Tech Stack: React 19 · React Router DOM · Lucide React · CSS · Jest · React Testing Library · Create React App · Modular Component Architecture

ReduxCounter-WebApp [GitHub](#)

Overview: A minimal yet scalable React application demonstrating Redux Toolkit for global state management. Implements a counter with increment, decrement, and reset functionality, simulating real-world use cases like cart quantity updates while reinforcing Redux fundamentals and UI-state synchronization.

Features & Implementation: Counter State Management · Increment/Decrement/Reset · Redux Toolkit Slice Logic · Store Configuration · React-Redux Integration · Component-State Synchronization · Planned: Async Actions · Middleware · Persistent State

Tech Stack: React.js · Redux Toolkit · React-Redux · Create React App · CSS · Git & GitHub · Modular Component Architecture

Review-Analysis-AI

Overview: A Python-based NLP application using LangChain that performs sentiment analysis, aspect-based sentiment analysis (ABSA), and summarization on product or service reviews. Developed to extract actionable insights from customer feedback, enabling data-driven decision-making for product managers, marketers, and analysts.

Features & Implementation: Sentence-Level Sentiment Analysis · Aspect-Based Sentiment Analysis (ABSA) · Review Summarization with LangChain · Hugging Face Pre-Trained Models · Multi-Review Aggregation · Python Virtual Environment Setup · Dashboard Visualization · API Integration

Tech Stack: Python · Hugging Face Transformers · LangChain · Torch · NLTK · SentencePiece · Tiktoken · Facebook BART · Modular NLP Pipeline Architecture

Summarise-AI

Overview: A Python-based NLP application that dynamically generates **age-tailored summaries** of complex text using Hugging Face Transformers and LangChain. Empowers educators, students, and content creators to make information **accessible, digestible, and actionable** for specific age groups.

Features & Implementation: Age-Specific Text Simplification · Intelligent Summarization (BART) · LangChain Prompt Orchestration · Multi-Text Processing · Command-Line Interface · Planned: Web Interface · API Integration · Scalable NLP Pipeline

Tech Stack: Python · Hugging Face Transformers · LangChain · Facebook BART · Torch, Torchvision, Torchaudio · Modular, Reusable NLP Architecture

EXTRA CURRICULAR

- Contributed to the **Publicity & Marketing Team** of Riviera'25 (VIT Fest), driving **1,000+ external registrations** through strategic outreach and promotional campaigns.
- Achieved **1st place** in the **Group Dance Competition** at Primavera 2023–24 (VIT Freshers' Event), showcasing strong teamwork, dance, creativity, and stage presence.
- Appointed **Deputy Head Boy** of the Student Council, Birla Vidya Niketan (2021–22), demonstrating leadership, event coordination, and decision-making skills.
